NOTICE Most of the features of Word have been disabled because it hasn't

a. 800000 b. 4000000 c. 300000 d. 900000 e. None of them

Question (2): For each of the following statements, State if the Sentence is True (A) OR False (E) [15 Marks]

11. Stemming increases the size of the vocabulary. (F)
12. The presence of skip pointers only helps for AND queries, not for OR queries. (T)
13. English stemmers improve recall for some queries but harm precision and performance for others. (T)
14. Processing queries in order of increasing document frequency of the search terms doesn't necessarily minimize the total work required by the system for each query. (T)
15. Stemmers produce valid words, while Lemmatizers might produce invalid words. (F)
16. The posting lists in the inverted index should be sorted by document size. (F)
16. The posting lists in the inverted index should be sorted by document size. (F)
17. Having more skip pointers results in longer skip spans and fewer successful skips. (F)
18. Stemmers process individual words without considering the context in which they appear. (T)
19. On modern hardware, skip pointers can be helpful when the index is memory-based. (T)
20. The K-grams technique is one of the methods used for normalization. (F)
