PROFESSIONAL SUMMARY

Business Information Systems graduate with a strong analytical foundation in business requirements documentation, system design, and data-driven decision making. Skilled at bridging technical and business perspectives — translating operational needs into structured, efficient solutions and coordinating effectively across cross-functional teams. Complements this with hands-on experience managing independent client relationships end-to-end — understanding client needs, communicating clearly, and delivering under deadlines — with a demonstrated ability to adapt quickly across analytical, client-facing, and technical work.
